## INTRODUCTION TO WEB DEVELOPMENT

*Learn the fundamentals of web development, including HTML, CSS, and JavaScript, to build your first interactive websites.*

⌚ 6 weeks (approx. 40 hours) ⚡ Beginner

**Description :-**

EDULEARN is an online learning platform designed to help learners build practical, job-ready skills. The website positions itself as a place where users can transform their future through structured, expert-led courses. It emphasizes access to a “world of knowledge at your fingertips,” highlighting convenience and flexibility for learners. Courses are taught by industry experts, suggesting that the content is aligned with real-world requirements and current trends. The platform focuses on helping users master new skills rather than just passively consuming information. It also targets career growth, stating that learners can achieve their professional goals through its programs. The phrase “comprehensive online learning platform” implies a wide range of subjects, levels, and resources in one place. A prominent “Explore All Courses” button guides visitors to start browsing available learning options quickly. The clean design and hero image of a learner using a laptop at home reinforce comfort, focus, and remote accessibility. Overall, the site presents EDULEARN as a modern, trustworthy hub for continuous learning, skill development, and career advancement.

**Thank you**

Thank you IBM and team magic bus for conducting the workshop we gained lot of knowledge from the workshop and how to work with it once again thank you

*Thank you*
